PROFESSIONAL SUMMARY

Detail-oriented and analytical IT graduate with a strong foundation in software engineering, data manipulation, and programming. Proficient in Python, C, and SQL, with hands-on academic project experience developing machine learning models for image processing and computer vision. Proven capability to manage structured technical timelines and collaborate effectively within team-driven environments. Eager to leverage technical problem-solving skills and backend development knowledge in an entry-level Software Engineer or IT Analyst role.

TECHNICAL SKILLS

Programming Languages:	Python, C, SQL, JavaScript
Machine Learning & DS:	Computer Vision, Image Processing, Dataset Generation, HDF5 Data Architecture
Databases & Tools:	MySQL, PostgreSQL, Git, GitHub, VS Code
Security & Networking:	Web Security Protocols, Network Security Lab Simulation, SQL Injection Testing
Soft Skills:	Team Coordination, Technical Documentation, Core Problem Solving, Bilingual (English, Gujarati)

ACADEMIC PROJECTS

Automated Image Restoration & Watermark Removal System

Lead Developer

- Designed and implemented a deep learning framework aimed at automated image restoration and watermark removal for digital asset cleanup.
- Generated and curated a synthetic dataset of over 5,000 images using Python scripts to train neural networks effectively.
- Utilized Hierarchical Data Format (HDF5) to manage and streamline large-scale training weights and image matrices, optimizing processing speed by 20%.

Database Management & Security Simulation Lab

Independent Developer

- Developed backend Python applications using advanced dictionary comprehensions and multi-variable data mapping for rapid data entry.
- Conducted controlled vulnerability assessments, including SQL injection testing, within isolated laboratory environments to audit database weaknesses.
- Optimized data input functions in C to securely validate multi-variable user inputs, significantly reducing memory overhead.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science

Graduation Year: 2026

Shantilal Shah Engineering College, Bhavnagar, Gujarat — Cumulative GPA: 8.4 / 10.0

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Machine Learning Foundations.

ADDITIONAL EXPERIENCE & CERTIFICATIONS

- **Certification:** Advanced Python Programming & Data Structures – Udemy (2025)
- **Project Management:** Successfully managed a 4-member team to deliver academic capstone goals within strict 90-day development windows by utilizing agile sprint tracking.
- **Technical Localization:** Voluntarily translated complex technical documentation and administrative guidelines between English and Gujarati for university department archives.
